

SolarTech Ltd.

Providing Energy for Today, Protecting the Environment for Tomorrow.

SolarTech Finance Solutions

SolarTech have a wide range of finance solutions that are tailored to meet the needs of individual clients and projects. With the introduction of the Governments Feed-in Tariff and Renewable Heat Incentive schemes we are able to offer innovative funding options, enabling our clients to fund their renewable energy installations.

Funding Options

Fully Funded: This option is available to Photovoltaic (PV) installations and open to Local Authorities, Housing Associations, commercial organisations and homeowners. Each project will be reviewed on its merits and suitable projects will be fully funded at no cost to the end user. This solution will deliver the end client a free PV system and reduced energy bills. The income from the Feed-in Tariff is used to fund the initial installation and 25 year maintenance costs. At the end of the 25 year period, ownership of the system is transferred to the end client.

Partially Funded: This option is similar to the fully funded contract, however, the end client will make an

equity investment into the funding organisation (S.P.V.), which will enable the client to enjoy a financial return on their investment. Typically the end client may invest 20-30% of the project value and can use this solution to gear up their investment, enabling much larger contracts to be carried out.

Lease Funding: SolarTech have negotiated terms for the leasing of a range of renewable energy technologies including PV, Heat Pump, Solar Hot Water, Bio-mass and Wind. The lease will typically be over a 10 year period, at the end of which, the ownership of the system is transferred to the end user. This option will enable the capital cost of installation to be spread over a number of years. Any income from the Feed-in Tariff or Renewable Heat Incentive goes to the end client, not the finance provider.

Our team will be pleased to advise you on this range of financial solutions and to advise you if your organisation or project would qualify.
